Seems rather racist too

I am writing to express my strong opposition to the proposed Fountain Wind Project in Shasta County, California. I believe that this project poses significant environmental, social, and economic risks that must be carefully considered and addressed.

Kinda reads like more racist zoning to me. Yâ€™™all didnâ€™™t have a Black community to bulldoze despite opposition, so you decide tribal lands would be just fine instead?

I urge the California Energy Commission to conduct a thorough and transparent review of the Fountain Wind Project, considering the potential consequences it may have on the community and environment. It is essential that all relevant stakeholders, including local residents, are given the opportunity to voice their concerns and have their input taken into account during the decision-making process, especially considering that Shasta County has twice rejected this project already.

Thank you for your attention to this matter. I trust that the California Energy Commission will carefully evaluate the concerns and objections of the residents of Shasta County before making any decisions regarding the Fountain Wind Project.
