NO Lithium Storage in OC

Everyone needs to take a hard look at what recently happened in LA County with fires. Please take account of the death, damage and fire ruins, loss of pets and loss of life. This cannot be related over and over due to poor and selfish decisions. Anything that is related to a lithium power or storage facility needs to be off the 241 toll road, on the 15 freeway on the way to Las Vegas or in an area where there are NO homes.

I ask that you rethink the situation and I say NO to building this in Orange County.

Thank you.
