Rulemaking on Appliance Efficiency Regulations for Water Closets

The Energy Commission may wish to delay the effective date of its Title 20 Appliance Efficiency Regulations for dual-flush tank-type water closets, found in Article 4, Subsection 1601-1605.3, to July 1, 2027. This will avoid conflicts with corresponding water closet installation regulations in the 2025 California Plumbing Code and CALGreen Code (Parts 5 and 11, Title 24), which are based on federal WaterSense specifications. This will allow BSC to engage with affected state agencies and the regulated community on the impact of the proposed code change.
