An Illogic Location!

To Whom it May Concern,

It's so obvious that a project like this does not belong in the immediate area of residential communities! Many years ago they tried to build a Crematorium on this same site. That idea is just as absurd as this Lithium Storage Project. Human beings live nearby!!

We have a very close elderly friend who lives on a cull-da-sack in the Concord Housing Tract just above where this Project is (proposed) to be built. Both she and many of the nearby neighbors had no idea that this project was to be built. It was a total surprise! Is there not a requirement that you (CA Energy Commission) need to notify effected residential communities? If it wasn't for a local Real Estate Agent that told us about it and subsequently, the Concord Community, none of us would know about it. I wonder how many other families don't realize what's going to be built nearby?

This project belongs in an area like: Off CA 395 in the Hi-Desert or off the I-15 outside Baker or along that same highway toward Davis Dam.

I have heard on the evening news, probably 3 times at least in the past year, about Lithium batteries catching fire on an airliner or on a truck carrying Lithium batteries. All it takes is 1 time.

Please, for the sake of our communities here in Laguna Heights, seriously re-consider locating this Lithium Storage Project to a safer area away from residential housing.

Respectfully,
Donald & Julie Boyd
