## **Opposed to building in location planned**

While I am not opposed to battery storage plants, the planned location is San Juan Capistrano makes no sense. It is a dry area that leads to the ocean and will contaminate the marine life. Not to mention, there are millions of residents who live in the area. There have already been numerous lithium-ion fires. In several other states, the plants are not in densely populated areas. Who pays for the evacuation of all of the residents? We all barely have home insurance already. This would be the death of insurance for a few million local residents. The recent fires in Los Angeles, taught us that the contaminated soil would have to be removed, 12 inches has to be scraped out before they can rebuild, Let Saddleback Church buy a facility in the desert for BESS. Maybe Hobby Lobby could donate more to this too.
