NOTICE OF RECEIPT
PETITION TO AMEND
THE CALIFORNIA ENERGY COMMISSION DECISION FOR THE
INLAND EMPIRE ENERGY CENTER (01-AFC-17C)

On October 7, 2014, Inland Empire Energy Center, LLC filed a petition with the California Energy Commission (Energy Commission) requesting to modify the Final Decision for Inland Empire Energy Center (IEEC). The combined-cycle, natural gas-fired, 810-megawatt facility was certified by the Energy Commission in its Decision on December 17, 2003. Unit 1 began commercial operation in January of 2009 and Unit 2 in June, 2010. The facility is located in the City of Menifee, in Riverside County, California.

DESCRIPTION OF PROPOSED MODIFICATION
The modification proposed in the petition would replace one of the IEEC’s existing General Electric (GE) 7H-technology gas turbines (GE S107H) with a functionally identical GE 7HA.01 gas turbine, the latest generation in H technology.

Modifications also proposed in the petition would:

- Change Air Quality Conditions of Certification AQ-8, AQ-17, AQ-34, and AQ-SC16 to comply with South Coast Air Quality Management District’s testing requirements for the GE 7HA.01;
- Delete AQ-SC17 because Energy Commission Air Quality Staff has stated it is no longer necessary;
- Add new Condition of Certification AQ-SC18 for Energy Commission reporting compliance for the new turbine;
- Update NOISE-6 for field noise survey after the new turbine installation; and
- Update STRUC-1, STRUC-2, TRANS-1, and TRANS-2 for the new turbine installation.
