Battery Farm

I am writing to express my concern and complete opposition of the battery farm whing proposed in San Juan Capistrano. The location is close to 4 Million dollar plus homes which it endangers. Further more, when one of these catches on fire which it will, it endangers all of Orange County. The area is a huge fire zone over there anyways but the toxic gases from it would be a huge issues.

Do not allow this. It's coastal and endangers so many people, animals and homes. Put a battery farm out in the middle of no where, not in a community.
