Stop the Fountain Wind Project

This Project poses significant negative impacts to the area including:

Impacts to cultural and Tribal resources of the Pit River Tribe and Other Tribal Nations in Shasta County.

Elevated wildfire risks and impediment to Airial firefighting in an already fire-prone area.

Threatens local decision making and community input for future projects across California.

Endangerment of Wildlife.

and more!

Threatens local Bald eagles, spotted owls, raptors and migratory birds located in this "Globally Significant Avian Area".

Also likely to affect various mammals due to the ability to hear and use infrasound and other noise affects shadow flicker, et

Project approval would result in the destruction of sacred Tribal and cultural lands and resources.

The Pit River Tribe, Redding Rancheria, and other neighboring tribes are strongly opposed to the Fountain Wind Project.

The Fountain Wind Project, if approved by the CEC, would set a dangerous precedent for similar projects across the State of California to bypass local legislators for project approval.

This transfer of authority poses a significant threat to local decision-making and community input. While the Governor's Administration assured that the passing of AB-205 would not be used to circumvent local legislators, the opposite has proven to be true.

After being rejected by both the Shasta County Planning Commission and the Shasta's County Board of Supervisors, Fountain Wind is now looking to supersede local laws and authorities by seeking State approval.
