## **Proposed BESS facility in San Juan Capistrano CA**

This is a densely populated region with dry shrub and very high fire risk potential. The storage facility will pose an imminent and very probable fire and public health risk. I oppose the construction of this facility at the proposed site. It must be placed in a much more remote area. Additionally, Applicant should re-design the facility and operations to adhere to the newly proposed CPUC regulations. I do hope these public safety concerns will be considered. Thank you
