Opposition to Compass Energy Storage Project

I am very concerned about this project and the potential for complete disaster for our neighborhood and city, like what happened in northern California with the Moss Landing facility. I realize that these energy storage facilities need to be built/implemented for our transition to cleaner energy and support that, but having these types of storage facilities so close to homes and where people live makes no sense to me, when there's so many other areas that are far from where people reside--like San Onofre that already has a tremendous electrical infrastructure. The proposed area for this project is also prone to fires, which could result in a lot of destruction if the facility catches fires. Please find another location away from where people live.
