|---|---|
| **Docket Number:** | 23-OPT-02 |
| **Project Title:** | Darden Clean Energy Project |
| **TN #:** | 261851-6 |
| **Document Title:** | Staff Memorandum on Record of Proceedings_Attachment 5 |
| **Description:** | N/A |
| **Filer:** | Ngoc Tran |
| **Organization:** | California Energy Commission |
| **Submitter Role:** | Commission Staff |
| **Submission Date:** | 2/18/2025 2:20:37 PM |
| **Docketed Date:** | 2/18/2025 |

**Subject**: Re: Darden Clean Energy Project (23-OPT-02) - currently proposed BIO mitigation measures

Hi Becky,

If you have a full text list readily available that would be great, thank you! Also, if you could provide an update on the Estep articles that would be greatly appreciated so Carol can start reviewing the background information.

I wanted to share that I will be transitioning to a new role at the CEC and will now be the Bio Unit Supervisor. Lisa will be taking over PM duties but I will be assisting during the transition. I will be helping resolve any outstanding items we move along in the process.

Thanks for all the coordination to date and it has been great working with you and Will as a PM on the Darden project!

Ann

Hi Ann,

I prepared a compiled list of mitigation measures a little while back to have them all handy for referencing and can provide that full text list, or can provide just the numbers and titles as requested if that's preferred. We are

also going through to update/redline to remove references to hydrogen or other items superseded by information in subsequent data requests. Let me know what you prefer and we can get that over to you soon.

Thanks,

Becky Moores

Hi Becky,

Would you be able to provide a complete list of mitigation measures proposed by the applicant for Biological Resources, in consideration of any changes made during the data request response process? We do not need the language of the measure just a list of numbers and titles - similar to page 5.12-45 of the BIO section of the opt-in application. Staff needs to develop a final list of COCs for the DEIR and this would help in integrating the applicant's mitigation measure with any proposed conditions of certification.

Thanks!

Ann

Hi Ann,

I am going to send the report documents now through Kiteworks due to the size. Hopefully you will have a kiteworks notification in your inbox in a few minutes.

Thanks,

Hi Ann,

Thanks for sending this request so we can review and respond quickly. We will work on gathering this data and submit through the docket. I'll respond to this email to let you know when the items have been submitted.

Thank you,

On Fri, Nov 15, 2024 at 3:53 PM Crisp, Ann@Energy <Ann.Crisp@energy.ca.gov> wrote:

Hi Becky,

While evaluating the application with respect to removal of the green hydrogen component, Water staff determined that the applicant's Data Request Response Set 4 (TN 256296) did not fully respond to Data Request DR WATER-19.

Detention basins are identified in Sections 5.13.1.2, 5.13.1.6, and 5.13.3.2 of the Application as a means of controlling the rate of stormwater runoff. In addition, Data Request Response Set 4, DR WATER-19 (TN 256296) includes Figure 4 which indicates the detention basins would be located at the northeast corner of (16) proposed drainage areas. However, the irregular shape of the detention basins shown in Figure 4 suggests the haphazard ponding of stormwater. Moreover, although details regarding detention basin design are presented in the applicant's Data Request Response Set 4 (TN 256296), a 2D Hydraulic Model and a Preliminary Drainage Report prepared by the applicant are heavily cited in the application materials and Data Request Responses, but was not provided by the applicant.

Please provide a preliminary design drawing of a typical detention basin, 2D Hydraulic Model, and Preliminary Drainage Report to further demonstrate how stormwater will be controlled.

Could you please let us know if you are able to provide this information in a timely manner?

Thanks,

Ann

**Subject:** Re: Darden Clean Energy Project (23-OPT-02) - green hydrogen question

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello Ann,

Please see response below regarding cumulative projects.

At this time, nothing has been submitted to CAISO for a hydrogen project. The project mentioned in the previous email is currently only a proposed solar and storage project. Although an application has been submitted to CAISO, the project viability will remain uncertain until mid-2025 when CAISO finalizes a project list and initiates the first cluster study. Therefore, we believe both the solar/storage project and the hydrogen project are not "reasonably foreseeable" for purposes of cumulative impacts analysis under CEQA. Additional information on CAISO's interconnection process is provided below to support this position.

The detailed information provided for projects applying for interconnection, either through a utility distribution or directly with CAISO, is considered confidential customer information and includes a proposed site location. However, projects may apply for interconnection through CAISO without site control, and several entities may propose competing projects for the same property. There is also a high degree of attrition in the interconnect application process. Therefore, applications to CAISO for interconnection positions cannot be used to reliably determine whether a particular energy generation project at a particular location is reasonably foreseeable or probable.

Applications to CAISO for queue positions are made to interconnect some requested number of megawatts at an identified substation but do not predict exactly where a generation or storage project would be located in relation to the substation or what its characteristics would be. Specifically, after an application is submitted, CAISO will first subject it to a multi-phase study process to determine what system-wide and/or project specific upgrades will be required to allow the project to interconnect. The multi-phase study process can take years and

may end up determining that there is insufficient existing grid capacity for the project, and the interconnection request will require millions of dollars in upgrades, often making a project economically unfeasible. Even in cases where the upgrades evaluated by the applicant have been determined to be economically feasible, the location of a generation or storage project could be anywhere in a fairly large radius around that substation because multi-mile generation tie lines can be used to connect an energy generation or storage facility to a substation.

Finally, developers lose or choose not to maintain queue positions for a variety of reasons, including the network upgrade costs, interconnection facility costs, construction timelines, and queue position security postings. Per CAISO, approximately 60 percent of interconnection customers withdraw from the queue after receiving their phase 1 studies. (https://www.caiso.com/Documents/Feb8-2024-TariffAmendment-Postpone-2024-Interconnection-Request-Window-ER24-1213.pdf.) A Queue Cluster refers to the CAISO's bundling of applications for assessment. So, the fact that a developer has filed an application to CAISO for interconnection at a substation does not mean that a particular energy generation project will be approved at a foreseeable location within a foreseeable timeframe with foreseeable characteristics such that it can be said to be reasonably foreseeable or probable.

Hi Marisa,

In order to determine if we would consider this a cumulative project we are requesting the applicant submit a copy of the interconnection request that it filed with CAISO in April 2023 for the potential future hydrogen project (to be located near Darden). If the document is confidential, the applicant can submit the document to the CEC along with an application for confidentiality.

Any questions please let me know.

Thanks!

Ann

Ann,
Here's the schedule for the potential future hydrogen project's interconnection process:

- We filed an interconnection request in April 2023
- We will refile in order to submit evidence of meeting the site control requirement in October 2024 (projects that fail to meet the requirement will be removed from the queue)
- If the project continues to qualify, we will have preliminary information about project viability from an interconnection standpoint in May 2025
- If the project continues to qualify, the cluster study process would start in June 2025 and would conclude in November 2025

Hi Marisa,

Thanks for the call yesterday. We were looking for clarification on the plans and timing to file with CAISO for the future green hydrogen project?

Thanks,

Ann
