Compass Energy Storage Project

As a thirty year professional firefighter serving communities within Los Angeles County, I swore an oath to protect civilian life, environment and property. During my career I have engaged in many firefighting operations; none more difficult than fires involving lithium battery technology.

Catastrophes from lithium battery mishaps have and will continue to affect the human lives, environment and properties that today's civil service employees have signed on to protect.

With there already being a pertinent history of lithium battery mishaps, our citizens within these affected communities are not only concerned but bewildered for this lack of conscience awareness on behalf of Compass Energy for pushing this storage project and CEC for possibly approving.

The question that needs to be asked to both agency representatives is, how would they like it if this same proposal was in their "backyard"?!
