Ban Lithium Storage in San Juan Capistrano

I understand Saddleback Church has sold their Rancho Capistrano property to a company that plans to build storage facilities for lithium batteries. The fire risks associated with lithium batteries will destroy our home values and make our properties uninsurable, to say nothing of the health concerns from toxins as a result of fires. How is my State allowing this to happen in our residential areas?! Why can't this be done somewhere less populated where so many homes and people will not be affected?! This sounds like something Trump would approve, not the governor of California. Please BAN the purchase by this entity!!
