3rd Party Evaluator reporting on SB350 (LD public, MD, HD EV Charging trends)

I am curious to what extent the CEC team has had the opportunity to digest the reports our 3rd party team (in concert with the Investor Owned Utilities) has produced. The most recent report (published October 2024) added a statewide section with details on Transit Bus, School Bus, Medium Duty and Heavy Duty. Each utility has their own fleet section split between fleet and public light duty. The data speaks to load curves, maturation of fleet operations (adherence of time of use rates, load growth), public charging adoption and more.
