Opposition to Compass Battery Storage Facility in San Juan Capistrano

These types of facilities are a known, well-recognized fire hazard.

With this in mind, the site is too close to homes and schools.

Also immediately adjacent to major rail line for commuter and freight traffic as well as Interstate 5, the major artery connecting Los Angeles and San Diego, used by tens of thousands of cars each day.

Additionally, any water runoff resulting from fire suppression would drain into a waterway that drains directly to the ocean.

This site is a BAD idea. Please do not approve.
