Protect Fair Competition to Protect HERS Raters

T3 Energy would like to express concerns regarding the potential approval of the Golden State Registry as a provider. If approved, we urge the CEC to ensure transparency throughout the process and to protect all Rater Companies, especially considering the clear conflicts of interest involved. Golden State Registry is owned by the former operators of iPermit, which raises questions about impartiality.

As a company in a highly competitive industry, we pride ourselves on delivering top-tier service, expertise, and support for Title-24 and energy code compliance. Allowing a new provider to enter the market with the ability to favor certain raters, offering discounts or preferential treatment, would severely harm our industry. At T3 Energy, we maintain the highest standards of fairness and believe that only providers committed to upholding these principles should be approved.

We urge the CEC to ensure that all current and future providers are held accountable, ensuring a fair HERS market where Raters can effectively perform their duties and enforce the code.
