## **Disallow Compass energy storage project**

Please DO NOT approve this battery energy storage project! It is dangerously close to homes, schools, businesses and historic fire areas! With the fires we are coping with in Southern California, we must not allow a lithium ion battery storage to be built so close to our population! A fire or electric sparks will trigger explosion, and release toxic chemicals into our community, destroy houses and potentially kill citizens! Projects like this should be built in more remote areas away from the general population of homes and schools!

**DO YOUR JOB AND DO NOT APPROVE THIS PROJECT!**
