## **Fountain Wind Project**

I am opposing the Fountain Wind Project. I , myself have seen firsthand the amount of birds of prey that have been killed by the blades of a wind turbine. Also, the government recently has talked about the new green deal , which this is not at all. When the turbine goes out of commission in 5-10 years , it's tower and blades will be non recyclable , and the materials off the blades will blow off in the wind that people and animals will inhale that are cancerous, the towers /blades are ugly and create vibration. There is always the question of cost versus efficiency also. I think nuclear energy of some sort is a better energy source that pays for itself and generates more energy needed for a raising population in many area's.
