Do what is good for Shasta county!!

Shasta county has been raped by the California legislature for long enough! We are frequently forced to live in drought conditions while being forced to ship our water to those who could easily afford to purchase it from other states who do not face wildfire risks. The lack of forest management combined with the gross neglect of electrical infrastructure has caused some of the deadliest fires in history. Simply put Shasta county cannot afford these windmills to be placed. Local government has spoken; let their decision stand.
