Do Not Destroy what is NOT yours

All companies always say they have our best interest at heart, yet in all reality, they do not. They do not look at the whole picture. They only see WHAT THEY WANT TO SEE, which is money. This company is just like the rest of them, they don't see the whole picture of what is to come in the future. All the problem it will cause in the long run. Fire hazards, disturbing the land and nature, causing wild life disruptions, and not to mention pollution from building on this land, and what I mean by that is, dirt roads cutting in and out to the maintenance people can drive in there to keep these things moving, and in doing so, it disrupts the wild life and habitat. Not to mention the littering that happens by people throwing their trash out the windows of their vehicles. This is Not your land to do as you please. This land is already taken, and is being protected as it should be.
