Against the BESS Energy Storage project

I am a resident of San Juan Capistrano. I live down the street from the proposed battery storage site. On behalf of every resident in San Juan and the surrounding area I implore you to not allow this battery storage on our land. The health implications alone for those of us who live nearby is so concerning and grotesque. Modern battery storage facilities, while seemingly beneficial, have well-documented dangers, including fire hazards, toxic chemical exposure, and environmental contamination. The potential for battery fires and leaks could release harmful pollutants into the air and water, posing severe health risks to families including our children, elderly members, and those with pre-existing conditions. We don't need more cancer or ailments in our life. We don't need our soil depleted of nutrients because of potential spills or risks. Please think of the children and families that call this amazing city home!!!! Do not let this plan move forward. If you yourself wouldn't want to live next to this, please don't make my children.
