Opposition

We oppose the building of this storage for many reasons, predominantly the high fire risk. My children play in Trabuco Creek often and should a fire occur I would be extremely worried about the environmental impact of the area and our surrounding ocean. As our family spends more and more time in San Juan Capistrano I have learned how special this land really is. There is farmland and Native land, is this really what we want in this beautiful area? Please oppose this so our children can play in the open space safely. Thank you.
