I oppose BESS at Rancho Capistrano

I strongly oppose BESS at Rancho Capistrano. This facility would be bad for our community for our children's health and for our environmental health. It is highly unpopular with the mothers in this area and we intend to strongly oppose this every step of the way. Furthermore, this land was donated to the church by John Crean, with the intention of having this land used by the community as a community center as a place where children could exercise and play and be healthy. This was never the intention for this use of this land.

Furthermore, there was recently a large battery fire with a similar battery storage system in Santa Cruz/Monterey. These types of battery storage systems are unsafe.
