BESS Facility-San Juan Capistrano

I am writing in opposition of the proposed BESS Facility in San Juan Capistrano. The interested area is surrounded by San Juan Capistrano and Laguna Niguel residences. It would also be built adjacent to Trabuco Creek, which is an environmentally sensitive watercourse that flows to the ocean. There have been fires at BESS facilities nationwide. Should a fire occur at the proposed commercial BESS site, fire extinguishing compounds used to combat the fire (either from the ground or air) would have the potential of entering the creek and significantly impairing water quality and native flora and fauna. Once again, I am stating my opposition of the BESS facility project in San Juan Capistrano.
