Rancho Capistrano proposed Lithium storage facility

I am completely opposed to a lithium storage facility at Rancho Capistrano in San Juan Capistrano. It is near a dense neighborhood atop the hill in Laguna Niguel and a major freeway. That land was used for many years for the public and church programs. Rick Warren was supposed to keep it for that reason. The City of San Juan denied it's development as a lithium facility. You should not have approved it. Shame on you folks and Rick Warren. I am a Laguna Niguel resident and am highly concerned about the environmental dangers of this proposed facility. You need to retract your approval and tell the new owners they can build in the desert far away from human life. I am an artist and have visited that land in Rancho Capistrano for years, it was home to many orange trees, bees, birds & other wildlife. Let's return it to a park.
