I oppose the BESS location in San Juan Capistrano

Dear Members of the California Energy Commission,

While I understand the need for renewable energy solutions, I have major concerns about the location of this proposed Battery Energy Storage System (BESS project). I believe this project raises significant environmental, safety, and community impact concerns that must be addressed, including Environmental Concerns, Safety Concerns and impact on your citizens' quality of life.

Thank you for addressing our concerns and looking for alternative locations for this project.

Sincerely,
Lawrence Martocci
