No Compass Energy Storage

I'm writing to express my complete opposition to allowing such an hazardous facility to be built in San Juan Capistrano. Since this type of facility has already been proven to be extremely dangerous to nearby communities when a tragic fire happens, it would be irresponsible to allow such a potentially toxic site to built so close to family neighborhoods, not to mention in a historically significant part Orange County.

Since I live and work within 1 mile of the proposed site, I am greatly disturbed by this whole project. Please consider the people who live in the surrounding neighborhoods and the potential harm that would occur ...PLEASE deny approval of this project.
