Lithium Plant

I am absolutely against this idea. It would cause so much illness and cancer from the chemicals in our community and not to mention the risk of a major toxic fire. Let's not forget that there is a very high possibility of this being an ancient Indian burial ground. A company such as this should be in an open location, not in the middle of multiple condensed communities.

Shame on Saddleback Church for their greed and putting profits over human lives. They deserve their tax-exempt status to be revoked.
