No Lithium Battery Storage Facility

I strongly oppose this project. Terrible location too close to communities.

Fire Hazards: BESS systems have a history of high-temperature fires that can spread rapidly and are difficult to extinguish. There is no built in fire detection or suppression in the containers, any ignition will burn out of control! This is a windy area, our neighborhood is direct downwind less than 1 mile away, any wind blown embers from a fire could ignite our hillside and homes.

Toxic Fumes: Battery fires release harmful chemicals, potentially jeopardizing air quality and public health.

Environmental Risks: Potential groundwater contamination from battery waste.

Dangerously Near Residents: The proximity to schools, neighborhoods, and wildlife habitats potentially endangering families and ecosystems. The freeway is already a traffic jam most of the time. In the event of evacuation it would be a gridlock and there are no alternative routes.

Noise Pollution: Lengthy construction and ongoing / constant equipment operation.
