CAISO's estimates for the Network Upgrades and Interconnection Facilities completion timing and costs associated with upgrades applicable to the Project are confidential between CAISO and the Interconnection Customer, constituting a trade secret due to the private and confidential nature of agreement(s) between the two parties. These estimated costs and completion timing directly impact IP Perkins' forecasted economic standing and could be detrimental for the Project if external competitors were able to gain this information. Public disclosure of this information would negatively impact IP Perkins' competitive ability to negotiate with third parties on an ongoing basis given the confidential pricing and timing that has been secured and reflected in our estimates and forecasts. Industry competitors would be able to utilize this information to further their own negotiations with third parties with our data as leverage, enhancing their competitiveness and therefore negatively impacting IP Perkins.
