**Re: Fountain Wind Project, Docket 23-OPT-01
County of Shasta Invoice Reimbursement #3**

Dear Supervisor Chang and Mr. Woltag:

The County of Shasta (County) is hereby submitting the attached invoices totaling \$35,973.13 for expenses it actually incurred related to its review and comment on the Fountain Wind Project application. The County submits for reimbursement in accordance with Assembly Bill (AB) 205 establishing the California Energy Commission's (Commission) opt-in certification process, Public Resources Code §§ 25519(f) and 25538, 20 CCR § 1878.1, Commission reimbursement precedent, Commission staff and counsel direction, and applicable state law mandates. Invoices are being filed in the docket per CEC Staff Counsel direction and submitted concurrently to Commission staff and the applicant, Fountain Wind LLC.¹

Note that the County has retained outside counsel and consultants with expertise in the Eligible Activity items above to assist the County with its review and comments. All invoices are subject to applicable attorney-client privilege and have been redacted accordingly. The

¹ The County incorporates its prior comments from its first and second reimbursement requests. See TN 260946 and TN 261499.

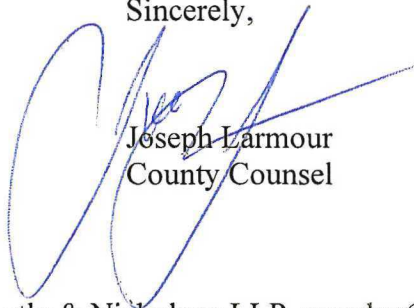

County has, however, segregated non-reimbursable activities, such as litigation advice or general meetings from the invoices and has not claimed reimbursement for these items. In an effort to ease Commission and applicant review, the County has marked reimbursable activity billing descriptions and line item entries with a stamp categorizing the Eligible Activity based on the coding system, without otherwise waiving privilege for the work product therein. The County has previously sought Commission direction on the process for filing reimbursement requests, as there is no written rules or process regarding reimbursement submittals, and has not received such direction to date.

To the extent that there is a dispute over a reimbursement invoice, the County anticipates and reserves the right to request Commission dispute resolution.

We are willing to meet with Commission staff and the applicant to further discuss and refine the reimbursement process.

Thank you for your review and consideration.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joseph Larmour', is written over the typed name.

Joseph Larmour

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights the need for researchers to be sensitive to the values and beliefs of the communities they are studying. This is particularly important in the field of education, where cultural differences can significantly impact learning outcomes.

The second part of the paper focuses on the methodology used in the study. It describes the process of selecting participants, collecting data, and analyzing the results. The authors emphasize the importance of using a mixed-methods approach, which combines both quantitative and qualitative data to provide a more comprehensive understanding of the research topic.

The third part of the paper presents the findings of the study. It discusses the results of the quantitative analysis, which showed a significant positive correlation between the independent and dependent variables. The authors also discuss the results of the qualitative analysis, which provided valuable insights into the experiences and perceptions of the participants.

The final part of the paper discusses the implications of the findings for practice and policy. It suggests that the results of the study can be used to inform the development of culturally responsive teaching practices and policies that better support the needs of diverse learners.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data collection and analysis techniques. The third part of the paper presents the results of the study, and the fourth part discusses the conclusions and implications of the findings.

The study was conducted using a quantitative research design. Data was collected from a sample of 100 participants using a survey questionnaire. The data was then analyzed using statistical software to determine the relationships between the variables.

The results of the study show that there is a significant positive relationship between the variables. This finding is consistent with the previous research on the topic. The study also found that there are some differences in the results between the different groups of participants.

The conclusions of the study suggest that the findings have important implications for practice and policy. Further research is needed to explore the relationships between the variables in more detail.
