I Oppose Lithium Battery Storage in SJC

Lithium battery storage has proven to be problematic and caused a big fire in a more remote area. The proposed site in San Juan Capistrano is a very populous area. Also, the site is next to unwatered plant growth. We have had at least 1 vegetation fire in this same brush, at this location.

For the safety of our surrounding population, I oppose Lithium Battery Storage at the proposed site in San Juan Capistrano.

It needs to be in a more remote area.

Thank you.
