Vahemently Oppose this battery storage system

As a nearby resident of this proposed site for the Lithium Battery Storage System, I am opposed to it's location so close to my neighborhood or any location where homes and residents are in danger! There have been too many disasters resulting in large fires, and injuries with these systems and we do not need it here. Find an area in a remote, unpopulated area, where homes and people are not in danger. With the recent LA fires, haven't you seen enough of these catastrophies?
