Disingenuous Support Petition Filed by Dudek

Dudek filed a support petition on 4/30/2025 with an Appendix B listing what it claims are stakeholders who support the project. Although the addresses are redacted the zip codes are visible. Most of the people on the list don't live anywhere near the proposed project. Most aren't even in Orange County. Some are out of state. They are not stakeholders. They won't be affected by toxic fallout from an accident like the one at Moss Landing that burnt for days and caused wide spread evacuations. That impact will fall on those of us in San Juan Capistrano, Laguna Niguel and Mission Viejo who are overwhelmingly in opposition to the project. It's our families, schools and communities that will be devastated in the event of an accident. It is unconscionable to even consider putting the facility in an area that so heavily populated near a river that flows into such an environmentally sensitive coastal environment. Please reject this project and consider a more appropriate site with less risk people, property and the environment.
