Dudek Support Petition dated May 1, 2025

The "Attachment B Support Petition (redacted)" submitted by Dudek should be completely disregarded as a legitimate petition. It lacks showing any supporting evidence for the petition as it was presented to signers with the reason for the request or the specific action being sought. Valid and customary signature collection was not followed: Seven of the 238 signatures were first names only and two signatures had no zip codes. Also recognized as the only sound practice associated with petitions, is that only signers be those who would be affected by the adversities of the issue. Signers in this petition were obtained from all over California, McMinnville, Oregon, Las Vegas, El Paso, Texas and Topeka, Kansas. Out of the 238 signatures, only 17 were signers within the sphere affected by the immediate location of the project in Laguna Niguel, San Juan Capistrano and Mission Viejo. In conclusion, it was a seemingly large group of supporters but it was all under false pretenses.
