No Lithium battery storage in our neighborhood

Bad Idea!

Do not store toxic, hazardous, dangerous, polluting, fire starter, toxic to breathe, ground water hazard, lithium batteries right near residential, schools, parks, ground water, freeway and business adjacent area. This is outrageous to think that a heavily populated location is safe or appropriate. A few months ago, one of these batteries in a car caught fire a bit north of here and the entire freeway was shut down for hours, residential neighborhoods were closed/sheltering in place for hours. One (1) lithium battery did all of this: closed a freeway, contaminated the air, nearby ground water, and closed blocks and blocks of homes! What a liability this would cause--to knowingly risk the health and safety of nearby residents, school children, business and freeway traffic.
