## **Deny the Storage Facility Construction**

It is critical that you deny this application because of the documented hazards and effects on property fire insurance and values but most importantly the quintessential public danger WHEN a fire occurs with homes, schools, churches, major freeway, major rail line and water sources that will be contaminated.

Please consider the overwhelming impact on our local citizens who live and work in what would be the maximum danger zone located in such a heavenly populated and traveled area and stop this project as soon as possible.
