Wind farm developers will never get enough!

Please STOP the Fountain Wind Project in Shasta County. Local agencies, tribes, the CEC staff, and the residents of Shasta are against the project due to the negative impacts listed in their documents as submitted. However, there is another reason to invalidate this project: The project developer is from another country and does not share the love for our area that the residents have. The destruction of the view shed caused by this proposal is substantial. Our residents, as well as visitors to our area, seek to preserve its natural beauty. Once turbines are allowed, the developers will continue their attempts to add more and more turbines over the upcoming years until the mountains around our beautiful valley, and the valley itself, will be scarred forever! Please consider that the current proposal is an attempt to build upon Shasta County's first mistake, its existing wind farm. Please consider what has happened at Altamont, and Tehachapi, and DENY THE FOUNTAIN WIND PROJECT!
