Long Zhang
Roseville Electric
2090 Hilltop Circle
Roseville, CA 95847

Dear Long Zhang:

As required by Senate Bill 350 (De León, Chapter 547, Statutes of 2015) (SB 350) (in the Public Utilities Code (PUC) Section 9622) the California Energy Commission (CEC) has reviewed the 2023 City of Roseville Integrated Resource Plan (IRP) filing, which was received on January 8, 2024. The CEC informed the City of Roseville on December 5, 2024, that the IRP filing was complete, as required by Chapter 3, Section B.1 of the *Publicly Owned Utilities' Integrated Resource Plan Guidelines (POU IRP Guidelines)*.¹

Based on a detailed review and analysis of the IRP, standardized tables, and other supporting information, I have determined, as documented in the *Review of City of Roseville 2023 Integrated Resource Plan* (May 2025), that Roseville Electric's 2023 IRP is consistent with the requirements of PUC Section 9621, and meets California's energy and other policy goals, including:

- Achieving greenhouse gas emission reduction targets commensurate with the electricity sector's percentage of economy-wide reductions of 40 percent from 1990 levels by 2030.
- Meeting the Renewables Portfolio Standard of 50 percent renewable energy by 2030, based on SB 350, and 60 percent by 2030 based on SB 100.
- Ensuring planning goals related to retail rates, reliability, transmission and distribution systems.
- Considering the role of renewable resources, grid efficiencies, energy storage, and distributed resources in meeting peak demand.
- Addressing procurement of energy efficiency and demand response, energy storage, transportation electrification, and portfolio diversification.

The *Review of City of Roseville 2023 Integrated Resource Plan*, available in Docket No. 18-IRP-01, provides the details of the CEC's review and findings regarding the consistency of Roseville Electric's IRP with PUC Section 9621. The
