Against BESS in San Juan Capistrano

Hello,

I would like to voice my concern for the proposed BESS project in San Juan Capistrano. I realize these systems are necessary, however I don't believe this is a safe location for the project.

1. The location is too close to hills filled with greenery which is a huge fire hazard. In light of the CA fires in Palisades and Altadena, we need to learn from those tragedies.
2. The location is at the base of hills lined with homes above. Should a fire happen, those homes and families would be at risk.
3. The location is off a two lane street which limits access. There are not enough police and fire resources nearby should there be an emergency.
4. This will increase traffic on the already busy 5 freeway. The distraction the storage will attract will cause further slow down from both sides of the freeway, which could lead to accidents from distracted drivers.
