Terrible Idea, Obvious Greed

There is zero reason to have this facility in San Juan. A historic city with two high schools nearly just 5 miles each way down the 5 freeway from this proposed location? Awful idea. First the land used to be a hotbed of social soccer community and that was taken away from all the children in the area, now you want to build this battery facility? Just all so symbolic of greed, materialism and waste. San Juan Capistrano is a beacon of sensibility and an ever growing (see river street marketplace) unique community. Lets just have some sensibility our selves.
