STOP!!!!

Iâ€™m in shock that something like this would even be allowed to be built in a heavy community of homes, schools, families, NATURE - which is a huge fire hazard if this facility is put in place. This will not only be a HUGE fire risk, but a HUGE health risk to our air, our dirt, our bodies, our brains. Please build somewhere extremely rural where thereâ€™s not a lot of tree, but somewhere flat and deserted. If this were built and put in place, it will ruin our well being on so many levels. Put a stop to this horrible idea!
