123.2(i) Lost and Unaccounted For Gas (LUAF Gas)

LUAF Gas Cause	Cause contribute to LUAF Value (Y, N, N/A) <sup>(1)</sup>	Actual or Estimated?	If estimated, how is the value derived?	Value (MMcf)
<b>Physical losses of gas</b> Consists of inadvertent gas losses (e.g., leaks and dig-ins) and operational gas losses (e.g., facility blow-downs and purges).	No	Estimated	Result obtained from most recent (calendar year 2023) estimate of physical gas losses reported by PG&E pursuant to California Senate Bill 1371 and CPUC Rulemaking R 15-01-00R (Leak Abatement OIR).	1,367
<b>Small meter temperature error</b> Consists of billing error arising from the fixed temperature (60 degrees Fahrenheit) assumed for gas that flows through small meters that lack temperature compensation.	No	Estimated	Estimated for July 2023 through June 2024 based on (1) daily core loads derived from daily operating data, (2) daily system composite temperatures, and (3) the volume-temperature proportionality expressed in Charles's Law. The result was then scaled to be consistent with an in-depth analysis previously performed for calendar year 2014 based on hourly core usage data from smart meters and hourly temperatures at 24 PG&E weather stations.	893
<b>Small meter barometric pressure error</b> Consists of billing error arising from imprecise elevations (and therefore imprecise barometric pressures) assigned to small meters that lack pressure compensation.	Yes	Estimated	This component was the largest single contributor to PG&E's LUAF for many years. It is now estimated to be zero because PG&E modified its billing system in 2009 to assign exact elevations to every account.	0
<b>Small meter gauge pressure error</b> Consists of billing error arising from deviations in service pressures relative to standard service pressures in small meters that lack pressure compensation.	Yes	Estimated	Result obtained from PG&E's calendar year 2003 LUAF study. PG&E has not estimated this LUAF component since then.	185
<b>Customer meter bias</b> Consists of measurement error in PG&E's customer meters.	Yes	Estimated	Result obtained from PG&E's calendar year 2014 LUAF study (for small diaphragm, large diaphragm, and rotary meters) and PG&E's calendar year 2007 LUAF study (for turbine, orifice, and ultrasonic meters). PG&E has not estimated these LUAF components since these studies.	760
<b>Interconnect meter bias</b> Consists of measurement error in PG&E's interconnect meters with interstate pipelines, other gas utilities, California gas producers, PG&E-owned storage facilities, and independent storage providers.	Yes	Estimated	Result obtained from PG&E's calendar year 2014 LUAF study (for the Gas Transmission Northwest, Ruby Pipeline, and McDonald Island Storage interconnect meters) and PG&E's calendar year 2007 LUAF study (for the El Paso Natural Gas, Transwestern Pipeline, and Kern River Pipeline interconnect meters) and PG&E's calendar year 2003 LUAF study (for the California production interconnect meters). PG&E has not estimated these LUAF components since the referenced studies. PG&E identified meter bias at its Kern River Station interconnect with SoCal Gas in prior reports (July 2018 - June 2019 and July 2019 - June 2020) but subsequently corrected those meters. PG&E's Pleasant Creek storage field was not in operation during the study period; thus no LUAF is associated with its interconnect meters. No estimates of meter bias are available for PG&E's other interconnects with Questar Pipeline, Los Medanos Storage, and the Independent Storage Providers.	133
<b>Incorrect industrial and commercial meter sizing</b> Consists of measurement error arising from meters operating below their ideal operating range.	Yes	Estimated	Result obtained from PG&E's calendar year 2003 LUAF study. PG&E has not estimated this LUAF component since then.	398
<b>Broken locks</b> Consists of unbilled gas consumption that occurs after one tenant terminates service at a premises and before a new tenant initiates service at the premises.	Yes	Estimated	Result obtained from PG&E's calendar year 2014 LUAF study. PG&E has not estimated this LUAF component since then.	185
<b>Do-Not-Register (DNR) meters</b> Consists of unbilled gas consumption at meters that freeze or otherwise fail to register.	Yes	Estimated	Result obtained from PG&E's calendar year 2003 LUAF study. PG&E has not estimated this LUAF component since then.	139
<b>Therm rounding on customer bills</b> Consists of unbilled gas consumption arising from the practice of rounding bills to the nearest whole therm.	Yes	Estimated	Result obtained from PG&E's calendar year 2014 LUAF study. PG&E has not estimated this LUAF component since then.	120
<b>Gas theft</b> Consists of gas losses arising from illegal tampering with or bypass of customer meters.	Yes	Estimated	Result obtained from PG&E's calendar year 2014 LUAF study. PG&E has not estimated this LUAF component since then.	344
<b>Unidentified LUAF</b>	Yes	Estimated	Difference between Total LUAF and the LUAF components described above.	4,980

**Note:**

(1) The second column describes whether or not the LUAF component is included in the LUAF reported to DOT/PHMSA on Form PHMSA F 7100.1-1, Annual Report, Gas Distribution System. The instructions for that report directed respondents to exclude certain categories of LUAF: "Unaccounted for gas" is gas lost; that is, gas that the operator cannot account for as usage or through appropriate adjustment. Adjustments are appropriately made for such factors as variations in temperature, pressure, meter-reading cycles, or heat content; calculable losses from construction, purging, line breaks, etc., where specific data are available to allow reasonable calculation or estimate; or other similar factors." (See Instructions for Completing Form PHMSA F 7100.1-1, Annual Report, Gas Distribution System, Part G - Percent of Unaccounted For Gas.) Accordingly, where the second column indicates "No," the LUAF component is excluded from the LUAF reported to DOT/PHMSA, but is included in PG&E's total LUAF recovered through its shrinkage rates. Where the second column indicates "Yes," the LUAF component is included in both the LUAF reported to DOT/PHMSA and PG&E's total LUAF recovered through shrinkage rates.
