Battery Storage Facility

Please do not allow a battery storage facility to be built in San Juan Capistrano so close to so many residential and historical properties. Please understand the terrain in this location is surrounded by wild life and natural California hillside growth that would be so dangerous in the event of a fire. We are pleading with you not to put this potential fire hazard near our homes. We are so concerned with how this will impact the price of our homes as well as fire insurance. I'm hopeful we have all learned what can take place when fires occur. The LA fires were a tragedy. Please do not allow these battery storage units to be built in this area that is filled with kindling..
