No Battery storage BESS near wildlife, homes and school in San Juan Capistrano!!!

Why would you accept a project so close to schools, a creek full of precious wildlife and water that goes to the ocean and many homes??? This is a huge disaster waiting to happen. We have fires everywhere nearby, and if this area catches on fire all structures and the creek are in danger. STOP.

Find a location more remote. Our city can not have this in the beautiful open space next to our creek. Go inland away from homes and schools.
