## **concern regarding proposed energy storage facility**

I live in the Colinas de Capistrano neighborhood, a neighborhood adjacent to where the proposed Compass lithium battery storage site will be. My neighbors and I have been closely following the news of the Moss Landing catastrophe, and do not want to have the risk of a similar environmental and health catastrophe happening in our neighborhood. The land that the site is proposed to be is in a very high fire-risk area; there is always a lot of dry brush in the area, and we have already had recent fires in Laguna Niguel; and there are many houses like my own that are dangerously close to the storage site. The cities of San Juan Capistrano and Laguna Niguel oppose the building of this site, as do the residents. This facility would be catastrophic for our community and our community and residents should be able to decide about what happens in our backyard.
