## **Support for Compass Energy Storage Project in San Juan Capistrano, California**

The Compass Energy Storage Project in San Juan Capistrano, CA, is an overall net positive for southern California communities and for the state of California's resilience to the effects of climate change.

As a resident of Laguna Niguel, I support this project despite the concerns because Compass Energy is required to take the proper steps to mitigate environmental hazards according to CEQA and the CEC, as well as to coordinate with OCFA to ensure safe conditions. Additionally, the notable environmental advocacy group the Sierra Club has come out in favor of the project because of its ability to strengthen the regional electrical grid and for its support in expanding and maximizing the use of renewable energy sources.

I support the construction of a Battery Energy Storage System in San Juan Capistrano, CA.
