OPPOSITION to Fountain Wind Project

As I have commented for several years in various documents and proceedings, I will now keep my comments brief. Please refer to the most recent submission, dated today, by my daughter, Kelly Willett Tanner, an expert in Emergency Management for her excellent summation of the reasons why this project will be a complete disaster for the inhabitants and resources therein. As the owner of property adjoining this project and having intimate habitation on this property for 72 years, a million words would not suffice in describing all of the negative impacts, not just when the project is completed but any preliminary access and preparations prior. Since this proposal began several years ago at the county level, I have followed all results of wind energy internationally and its popularity is losing its steam everywhere due to the many negative results. DO NOT APPROVE THIS PROJECT!!!
