Opposition to Lithium Battery Storage

San Juan Capistrano is the home to many wonderful residents and businesses including much-needed affordable housing. The proposed Lithium Battery Storage facility is not compatible with the surrounding area and the threat it poses to the safety and welfare of the community outweighs the rewards. Heat, smoke, toxic gases and the risk of explosions are all clear dangers to the residents of San Juan Capistrano, wildlife, businesses, homes, the horsing community and to the people who rely on affordable housing. We stand with the community members and leaders when we say this is not the right place for a Lithium Battery Storage Facility and look forward to you fulfilling your commitment to serve the people of this community by making the right choice and voting "No" on this project.
