Opposition to Battery Storage Facility

I am a long time volunteer at the Shea Center for Therapeutic Riding, which is less than one mile south of the proposed facility. There have been a number of recent reports of fires at similar battery storage facilities, and due to the difficulty of extinguishing such fires, I am very alarmed by the potential danger to the Shea Center and to the homeowners nearby, as well as to the fragile ecosystem. We have several hundred people on site most days, the majority of whom have some sort of disability, and we have over 30 horses on our property at all times, which increases the complexity and danger of any fire evacuation. Logic and concern for the well-being of everyone in close proximity to this proposed facility should dictate that a better location for lithium battery storage must be found.
